## **NTR's Greenstar UK Commences Work on Four New Contracts**

**Contracts will see 70,000 tonnes of recyclables  
being processed annually**

**Dublin, 13<sup>th</sup> October 2009** – NTR plc, the international renewable energy group, announces today that its recycling-led waste management company, Greenstar UK, has started work on four new contracts to process at least 70,000 tonnes of recyclables annually, a figure that could rise to nearly 120,000 tonnes a year. The contracts were secured with the North London Waste Authority (NLWA), Enfield Council, Coventry City Council and the waste disposal contractor servicing Hull City Council.

Under the NLWA and Enfield Council contracts, recyclables will be sent to Greenstar's Atlas facility at Edmonton before being sent for processing at its Aldridge 'super MRF' in the West Midlands. Once Atlas is fitted out as a MRF, the recyclables will be processed there for resale. In total, these contracts will generate in excess of 36,000 tonnes of recyclables, which accounts for 14% of Atlas' total capacity once fully operational.

Coventry City Council and WRG, the waste contractor serving Hull City Council, will send their recyclables directly to Greenstar's Aldridge facility for processing and sale to reprocessors and manufacturers.

### **Notes to Editors:**

#### **About NTR plc**

NTR plc, the international renewable energy group, builds and runs green energy and resource-sustaining businesses. Founded in 1978, NTR has evolved from being a developer and operator of infrastructure in Ireland to an international developer and operator of renewable energy (wind, solar and ethanol) and sustainable waste management businesses in the USA, UK, and Ireland. The company employs over 4,100 people.

#### **About Greenstar**

Greenstar is one of the UK's leading recycling-led waste management companies, offering national coverage. With forecast annual revenue of £121m, it manages over 270,000 tons of material a year, operates from nearly 40 facilities throughout the UK, has around 1,450 employees and runs a fleet of over 500 trucks.

Its numerous service capabilities meet needs ranging from complete waste

management solutions through to accredited dry recycling, reprocessing and exporting facilities. Greenstar also offers an approved compliance scheme. Whatever a company's waste requirements, Greenstar aims is to maximise operational efficiency and optimise recycling while ensuring its clients stay fully compliant.
